

## Machine (Deep) Learning for Autonomous Navigation/SLAM and Perception @ ANPL

- >> The Autonomous Navigation and Perception Laboratory (ANPL) at the Technion is looking for highly-motivated students to take part in exciting research activities
- >> Desired background: probabilistic inference/statistics, deep learning for robotics, ML /AI, coding experience
- >> Students from various departments are welcome to apply

### RESEARCH FOCUS @ ANPL:

- ANPL investigates single & multi-robot autonomy in uncertain environments
- Highly multi-disciplinary research, involves also experiments with real robots
- More information – **Google ANPL**
