

MSc position

In the Gottlieb lab for Metabolism in Health and Disease

to study metabolic changes in fatty liver disease and develop novel therapeutic interventions to treat a disease affecting millions worldwide.

You will use different model systems and advanced metabolomics techniques to investigate how metabolic pathways in the liver change and what can be done to correct them.

If you're enthusiastic about research and science, please send your CV to Sivan at sivanavi@technion.ac.il titled 'MSc student application'.
