Students, we want you!

The laboratory of Molecular Dermatology in “Emek” Medical center is looking for a graduate student (under the Faculty of Medicine).

The laboratory of Molecular Dermatology focuses in the research of genetic and inflammatory skin diseases. The research is based on “Based to Bedside” approach, and includes phenotypic description of patients, genetic analysis, and in vitro research, using cell cultures, genetic manipulations and advanced methods in cell biology.

Welcome to contact Dr Eran Cohen-Barak, head of the laboratory, Eran_co@clalit.org.il
